Tim Karani

IT Professional & Web Developer

Nairobi, Kenya | +254 711 618 616 | timothykarani001@gmail.com | tim-karani.netlify.app

PROFILE

IT professional with nearly two years of hands-on experience across media broadcast operations and a marketing agency, supporting office and field teams, studio and newsroom systems, server room infrastructure and business systems. Also builds and deploys web applications in PHP and MySQL, including the Faulu Career Guidance platform. Methodical, documentation-minded and focused on systems improvement, automation and technology-driven operational efficiency. Available for remote web application and website projects.

KEY COMPETENCIES

- Hands-on troubleshooting across hardware, software, users and networks
- Full-stack web development with PHP, MySQL, HTML, CSS and JavaScript
- Clear, structured technical and business-process documentation
- Detail-oriented and methodical in task execution
- Calm and effective in production-critical, high-availability environments
- Works closely with management and end users to turn needs into practical solutions

WORK EXPERIENCE
